“PDA”

A workshop for parents, carers and professionals

"PDA is a complex autism spectrum condition characterised by high anxiety and a need to be in control. Individuals with PDA are driven to avoid every day demands and require different handling strategies to those used with other children with autism.

This presentation will provide information and understanding about the condition and most importantly a toolkit of strategies that can be effective when parenting and caring for those with PDA.

Trainer: Laura Kerbey

Positive Autism Support and Training
Helping to put problems with Autism in the PAST
